

Your full range supplier

from formulation to final product

premium | mid | economy

in profile extrusion

Our offer for your extrusion

profile design
engineering
formulation development
material conveying systems
mixers
extrusion lines
extruders
co-extruders
tooling dies
tuning
calibration tables
haul-offs
cutters
saws
printing embossing laminating
laboratory equipment
quality measurement systems
material saving solutions
energy saving systems
extrusion process optimization
training
after-sales services
spare parts
retrofitting
R&D center
general contracting
turn-key projects

premium | mid | economy

Your profiles

surface quality

energy saving
speed
net operation time
cost/meter

GREINER. SOLUTIONS INSIDE EVERY EXTRUSION

premium | mid | economy

Greiner Extrusion Group.

We are a worldwide team of highly skilled experts with outstanding personal service and leading technologies for your extrusion. As a full-range supplier we offer customized solutions for the entire performance range in extrusion.

globally close to you

10 production & service sites – Europe, America, Asia.

6 tuning & testing centers

Austria, France, USA, China.

15 extrusion lines permanently available

tuning of your tooling, training for your operators.
various twin-screw and single-screw extruders.
extruders for physical foaming.

our capacities for your orders

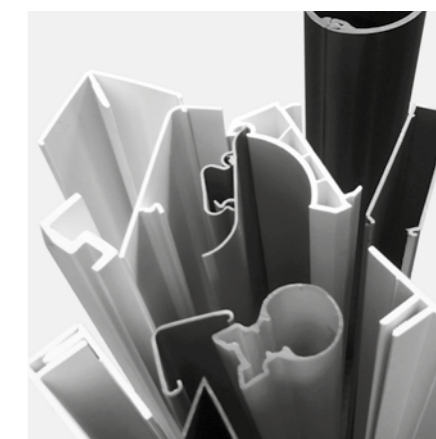

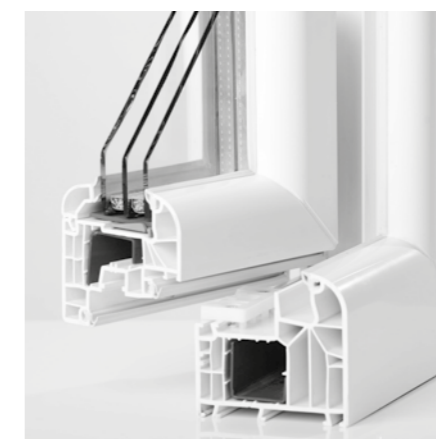

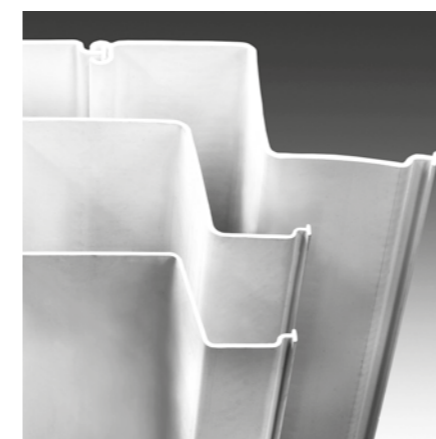

precision machining capacity – tooling:
> 2,400 units p.a.
manufacturing capacity – equipment:
> 240 machines p.a.

Making a difference is crucial to success in extrusion.

Better profile surface finish. Higher precision geometry. Less material consumption. Less energy consumption. Improved process stability. Greater reliability. Increased plant availability. Extended net production time. Professional solutions and excellence in service – provided by extrusion experts.

Improved profile quality. Lowered cost. Greater advantage in extrusion. Sustainably.

Customized solutions for the entire performance-range. premium | mid | economy.

Building & Construction

airing profiles
facades
isolation profiles
electrical profiles
cable ducts & conduits
decking
rain gutters
garage doors
fences
marinas
seawall panels
XXL profiles
WPC profiles
foamed profiles
special applications

Windows & Doors

window profiles
windows made of recycled plastics
window sills
door profiles
WPC doors
lift-slide doors
bathroom doors
shutters
sealings
spacers
special applications

Technical Profiles

skirting boards
cover profiles
edgebands
connection profiles
spacers
decorative profiles
cable ducts & conduits
power rail profiles
electrical profiles
lightings
safety barriers
glas-fibre reinforcements
special applications

Turn-key solutions for your profile extrusion.

benefit from our experience
gained from more than 4,200 extrusion lines delivered.

RED.LINE & RED.TOOLING

superior profile quality.
minimized material use.
lowest energy consumption.
fastest line speed.
highest process stability.
lowest total cost of ownership.

TEC.LINE & TEC.TOOLING

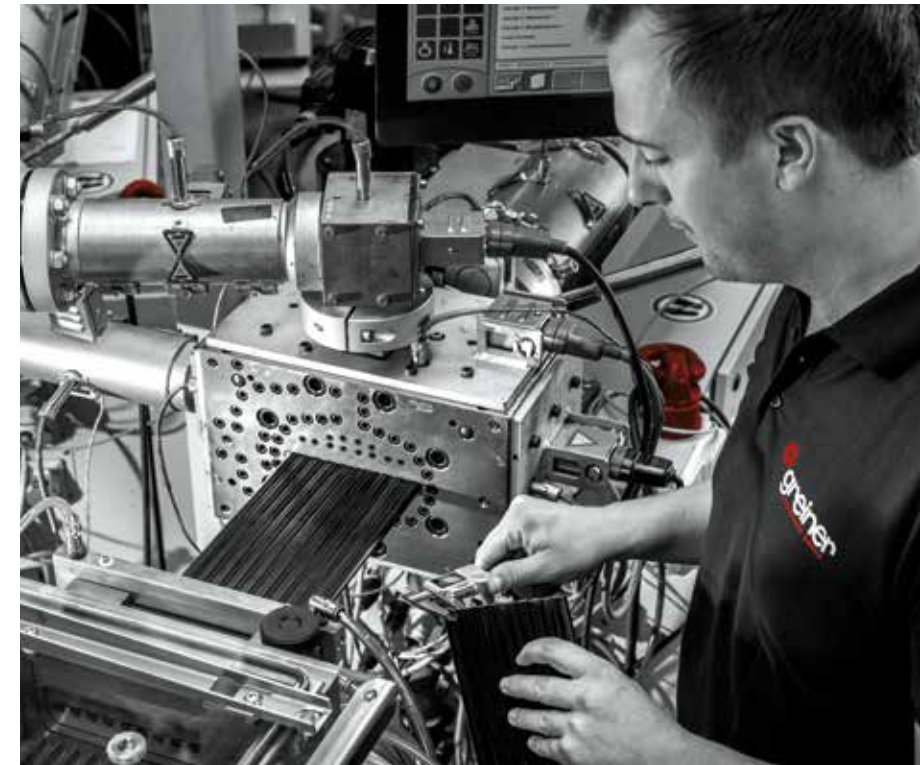

productivity to the point.
keeping you ahead in technical profile extrusion.

Ahead in technology & innovation.

adding value to your extrusion.
providing higher efficiency.

multi-layer co-extrusion.

competence in materials: PVC, PP, PE, ABS, PC, PMMA,
wood plastic composites (WPC), glass fibre compounds and beyond.

FLOW.CONTROL

lowest material consumption.
highest geometry precision.
shortest start-up time.

RED.PCE plus

ahead in post co-extrusion.
best adhesion of your gaskets.
less energy required.
shorter change-over times.

R&D Center

FEM flow simulations
intelligent design software
material research
laboratory equipment
surface measuring systems
tailor-made solutions

Efficiency +

profile weight optimization
energy saving systems
process automation
machine upgrades
tooling upgrades

Engineering & Consulting

plant performance
formulation development
product development
profile quality improvement
reduction of extrusion cost

General Contracting

turn-key projects
industrial engineering
plant engineering
project management
installation & start-up
training

Services & Spare Parts

process improvements
preventive maintenance
service packages
retrofitting
refurbishing
wear and tear parts

Delivered value to us:
Scrap rate – 67% reduction.
Line speed – 2x.
Tool life – already at 2x.

quoted by a leading profile extrusion firm, 2016.

Greiner > 4,200 extrusion lines installed.
 > 25,000 tooling commissioned.

more references.
richer experience.
better solutions.

Greiner ahead in technology and innovation.
 Since 1977.

providing higher efficiency.
adding value
to your extrusion.

Greiner tool-design experts ahead in experience.

deeper knowledge.
faster tuning.
shorter time to market.

Greiner tuning experts ahead in performance.

making the difference.
for your profile quality
and line speed.

Greiner global production & service sites.

Austria. Czech Republic.
France. Poland.
USA. China.

Greiner technicians speaking your language.

10 languages.
direct communication.
better results.
